

# Ripstation 7000 Series

## Professional Grade CD Ripping Systems

### Fast, Reliable, Affordable

The Ripstation from Formats Unlimited has fast become the industry standard media ripper. Ideal for service bureaus providing digital music conversion, custom installers, retailers and on line music stores, the Ripstation 7600 Series is the benchmark for automated CD and DVD conversion and ships XiVA ready out of the box.

Engineered to perfection the Ripstation is designed for long run disc ripping with absolutely no human intervention. Completely automated, the Ripstation will extract audio and video from CDs and DVD's at high speed and gather accurate metadata including artist, album and cover art for each and every track.

The "KVM" PC built-in solution means each Ripstation System is pre-configured for XiVA which results in easy setup without error - simply connect Keyboard, Video Monitor and Mouse and begin ripping.

Ripstation is simply the most feature packed and reliable system on the market and from the moment you open the box to the last disc of the day, you can count on Ripstation.

Designed for:

# XiVA™

*Click-n-Rip    Autoloading*

*Web Based Metadata    Software Wizard*

*10 Minute Setup    Asynchronous*

### Disc Ripping Abilities

<b>Metadata</b>	<b>Accurate &amp; Consistent Music Information</b>
<b>Cover Art</b>	<b>Obtain Highest Resolution Album Artwork</b>
<b>Backup</b>	<b>DVD or Hard Disk Backup Ability</b>

# Ripstation 7000 Series

## Best Metadata Available

Since metadata is the key to audio management, the Ripstation uses a combination of up to 6 metadata services including licensed, paid-for metadata services such as AMG and GD3. This insures extremely accurate and consistent data for every CD and DVD ripped including high quality cover art. So whether you play it on an iPod or large screen Plasma you have the best resolution available.

## Total Quality

Ripstation ensures you have an accurate, bit for bit and error free rip each and every time by deploying enhanced error checking.

## Format support

The Ripstation series can rip to every audio file format for XIVA including Flac, WMA, MP3 and AAC and can rip multiple files at one time. Its video option supports all XiVA platforms.

## Support for XiVA

The Ripstation team have worked closely with the XiVA partners to ensure full compatibility with Imerge, Elan, Sunfire and Speakercraft devices, and your Ripstation will ship pre-configured for XiVA right out of the box with all loading instructions to enable a standard, consistent delivery to your client at every stage.

## Powerful and flexible, yet simple to use

Using Ripstation is simple – load the discs, choose CD or DVD, press start and select you target device and file format. At this point the Ripstation automation takes over and processes every disc providing detailed reports for the batch. Our industry experience also allows Ripstation to be configured for every possible output and requirement.
